Our History
Our headquarters and manufacturing facility, located in Decatur, Tennessee, was formed in 2014 by father and son team, Mike and Baily Turner. This father and son team is building a company that is leading the development and production of innovative agricultural and rural-lifestyle equipment. Mike and Baily Turner know farming because their family farm dates back to 1898. They come from five generations of farmers and that’s why Titan’s products work so well in the rural markets - “we use what we make”. In addition to being long-time farmers, the Turners have 35 years in the manufacturing industry; this combination of farming and manufacturing make for a team you just can’t beat. Titan Implement’s products are also well-suited for nonagricultural uses, including landscaping, light construction, and municipal markets.

Our Mission
Titan’s goal is building reasonably priced equipment that is high quality, innovative, dependable, and does the job for which it was purchased. We maintain the flexibility to respond to our customer’s changing demands. We are committed to working closely with all of our valued distributors and dealers to help meet the rural lifestyle needs of your customer base. We work hard to make sure your customers know that we stand behind the quality products they purchase from you. As a dealer, you can represent these products with confidence, knowing your customers will be pleased with the ruggedness and reliability of the Titan lineup.
Titan Implement manufactures a broad range of innovative, dependable, field proven agricultural equipment, including rotary cutters, rotary tillers, box blade scrapers, grader blades, landscape rakes, disc harrows, skid steer attachments, and the list continues to expand.
