

X-TREME GRAPPLE RAKE

Our Grapple Rakes are ideal for raking and loading debris. The shape of the grapple makes it easy to roll debris into tight places. A single grapple or two independent grapples are available. We use American made cylinders, rated at 4,000 psi, to handle the toughest jobs. Our Compact Tractor Grapple Rake is for use on tractors less than 40 HP. The Compact Tractor Grapple Rake is built heavy enough for rigorous use, but light enough for compact tractors.

Our re-designed Standard Duty Grapple Rakes are constructed from 3/8th AR400 Steel, and are rated for machines with 35-60 HP. The new design provides more strength, combined with a lower weight to maximize your grapping power. Our Heavy Duty Rakes are built with 1/2" top quality steel and are rated for 50-70 HP machines.
