

## X-TREME SKID STEER TRENCHER

The X-treme Rotary Tiller is a perfect attachment for tilling gardens and small fields. It's also great for deer hunters to use to make food plots. This tiller has a bidirectional rotation and can till ground up to 6" deep. We manufacture two configurations of rotary tillers. We make a low flow single motor tiller that runs between 14 -20 GPM. We also make a high flow tiller with a dual motor system that runs 20-40 GPM.

- Different chain widths, 36" or 48" lengths
- 15-20 GPM
- 20-30 GPM
- 15" auger
